

# Describing Three-Dimensional Figures

Use the diagrams of the three-dimensional figures to write the numbers in the blanks.

**Prism 1**

**Prism 2**

**Pyramid 1**

1 Face A has \_\_\_\_\_ sides.

Prism 1 has \_\_\_\_\_ edges.

\_\_\_\_\_ × the number of sides of one of the parallel faces = the number of edges of the prism

---

2 Face D has \_\_\_\_\_ sides.

Prism 2 has \_\_\_\_\_ edges.

\_\_\_\_\_ × the number of sides of one of the parallel faces = the number of edges of the prism

---

3 Face E of Pyramid 1 has \_\_\_\_\_ sides.

Pyramid 1 has \_\_\_\_\_ edges.

\_\_\_\_\_ × the number of sides of the bottom face = the number of edges of the pyramid
