

Using Arrays for Division

There are 126 children going on a field trip.

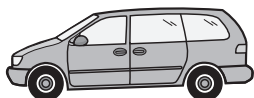

- 1 Each van can hold 7 children.
How many vans do they need?

- 2 But wait! These kids are not old enough to ride in the front seat. Only 6 children can ride in each van. How many vans do they need?

- 3 The teachers consider using larger vans that can hold 9 children. How many vans of this size will they need?

- 4 The teachers decide to use buses. Each bus can hold 48 children. How many buses do they need, and how many empty seats will there be?
