**Problem Solving****Use a strategy and solve.**

- $\textcircled{13}$  Wayne is building a fence around his garden. The garden is shaped like a rectangle. It is 30 feet long and 20 feet wide. If Wayne puts a fence post at every corner and another post every 2 feet, how many posts will he need in all? \_\_\_\_\_

- $\textcircled{14}$  One half of the students in Delia's class ride the bus to school. One third of them walk. The rest are driven by a family member. Write the ways students come to school in order from least to greatest. \_\_\_\_\_

- $\textcircled{15}$  Sam draws a square measuring 4 inches on each side. He draws a smaller square measuring 1 inch on each side. How many of the smaller squares could exactly cover the larger square? \_\_\_\_\_
