

Data Analysis and Probability

Complete the table.

1

Total Money Spent	Money Left
\$0	\$25
\$3	\$22
\$7	\$18
\$9	
\$12	
\$15	
\$18	
\$25	

2

Total Homework Problems Done	Homework Problems Left
0	23
2	21
5	18
6	
13	
15	
19	
21	

Problem Solving

Use a strategy and solve.

3 Draw the next 3 figures in the pattern.

4 At the end of each day, Jon puts all the coins from his pocket into a jar. After the first week, he has \$2.50. After the second week, he has \$4.50. After 3 weeks, the total is \$6.50. If the pattern continues, how many weeks will it be until he has at least \$20.00?
