

Changing Orders

Sometimes customers change the orders they place with the Eraser Store. When that happens, it is necessary to add or subtract erasers from an order.

Follow the directions to show how you would change each order. Then describe how each final shipment would be packed. Remember that there are 7 erasers in a pack, 7 packs in a box, and 7 boxes in a crate.

1 Original order: \square — •••• _____ erasers

Change in order: Remove — — • _____ erasers

Trade 1 box for _____ packs:

$\square \rightarrow$ _____ (Show shorthand.)

So, you have — — — — — — — — ••••

Now, remove the erasers and combine what is left:

There are _____ erasers left.

2 Original order: $\square \square \square$ — — — — _____ erasers

Change in order: Add: — — — •••• _____ erasers

Now, combine using the fewest containers:

There are _____ erasers.
