

Using Arrays to Model Multiplication

Complete each chart to find the number of squares in each array.

1

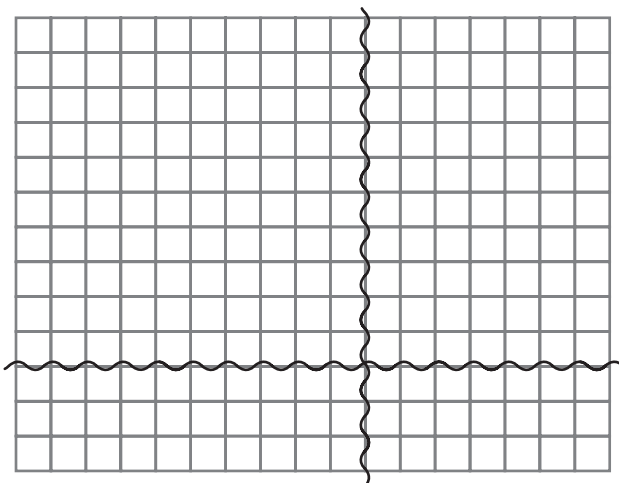

15×12

×	7	8	
6	42		
6			
12			

2

17×13

×	10	7	
10			
3			

3 There are two classes of 24 students and two classes of 20 students. How many buses will be needed to transport them if each bus has 11 rows with 4 seats in each row? Explain.
