

Number Sentences and Straight Lines

**Mark the first two points and draw a line.
Then complete the table and find a rule
to describe the points on this line.**

(x,y)
$(0,0)$
$(1,2)$
$(2, \text{---})$
$(10, \text{---})$
$(-2, \text{---})$
$(-6, \text{---})$
$(\frac{1}{2}, \text{---})$

Describe your rule with words or symbols.
