

Estimating and Checking Length and Perimeter

Without using a ruler, say whether each measurement is **correct**, **incorrect** or **impossible to tell**.

Perimeter = 12 cm

Correct Incorrect Impossible to tell

Area = 12 sq cm

Correct Incorrect Impossible to tell

Perimeter = 10.5 cm

Correct Incorrect Impossible to tell

Area = 4 sq cm

Correct Incorrect Impossible to tell

Perimeter = 9 cm

Correct Incorrect Impossible to tell

Area = 3.5 sq cm

Correct Incorrect Impossible to tell

Test Prep

4 Solve: $1.32 + 0.9 = \blacksquare$

- A. 1.329 C. 2.22
B. 1.41 D. 10.32

5 Solve: $1.32 - 0.9 = \blacksquare$

- A. 0.37 C. 1.23
B. 0.42 D. 2.22
