

**Algebra****Find the missing factor.**

①  $9 \times \underline{\quad} = 27$

②  $6 \times \underline{\quad} = 24$

③  $7 \times \underline{\quad} = 49$

④  $81 = 9 \times \underline{\quad}$

⑤  $3 \times \underline{\quad} = 30$

⑥  $\underline{\quad} \times 8 = 48$

⑦  $5 \times \underline{\quad} = 40$

⑧  $\underline{\quad} \times 6 = 42$

⑨  $\underline{\quad} \times 9 = 36$

**Problem Solving****Solve the problem. Explain your answer.**

- ⑩ A baseball stadium has 34 seating areas. Each area has 185 seats. How many seats are there in the stadium?

---

---

**Number and Operations****Find the number of squares in each array.**
