

Algebra

Write the rule that was used to find the output row.
Then fill in any missing numbers.

1

Input	3	6	7	8	10	11	
Output	9	18	21	24	30		36

2

Input	8	12	20	24	30		42
Output	4		10		15	18	

Measurement

Write the time shown on each clock.

time: _____

time: _____

time: _____

Number and Operations

- 6 A warehouse stores bottles of water. There are 24 bottles in a case and 28 cases in a carton. A truck carries 8 cartons of water. How many bottles of water are on the truck?

_____ bottles
