

Algebra**Find the missing numbers.**

① $3 \times \underline{\quad} = 18, 18 \div 3 = \underline{\quad}$

② $\underline{\quad} \times 5 = 20, 20 \div 5 = \underline{\quad}$

③ $4 \times \underline{\quad} = 28, 28 \div 4 = \underline{\quad}$

④ $\underline{\quad} \times 8 = 32, 32 \div 8 = \underline{\quad}$

⑤ $\underline{\quad} \times 6 = 30, 30 \div \underline{\quad} = 6$

⑥ $14 \div 2 = \underline{\quad}, 2 \times \underline{\quad} = 14$

Geometry**Choose the figure that does not belong. Explain.**

⑦

A

B

C

D

⑧

A

B

C

D

Problem Solving**Solve the problem. Explain your answer.**

- ⑨ Each day, Steven saves 5¢ more than the day before. On Monday he saved 15¢, on Tuesday he saved 20¢, and on Wednesday he saved 25¢. If he continues this way, how much will he have saved in all from Monday through Saturday?
