Data Analysis and Probability

For 17–19, use the bar graph. It shows the results of a class survey.

- 17** How much greater is the total number of students who went to the movies than the number who did not go at all?

- 18** How many more students went to the movies once than went three or more times?

- 19** There are 27 students in the class. How many of them did NOT take part in the survey?
