

Number and Operations

Find the number of squares in each of the two sections. Then find the total in the array.

A = _____

B = _____

A + B = _____

A = _____

B = _____

A + B = _____

A = _____

B = _____

A + B = _____

A = _____

B = _____

A + B = _____

Problem Solving

Solve the problem. Explain your answer.

- 5 A school cafeteria has square tables. Only 1 student can sit on a side. If 2 tables are put together end-to-end, 6 students can sit at the larger table. How many students can sit at a table made by putting 20 tables end-to-end?
