

**Measurement**

**Complete the number sentence.**

1 11 days + 3 days =  weeks

2 30 minutes  $\times$  8 =  hours

3 29 days - 8 days =  weeks

4 2 hours  $\div$  4 =  minutes

5 120 minutes  $\div$  2 =  hour

6 34 days + 8 days =  weeks

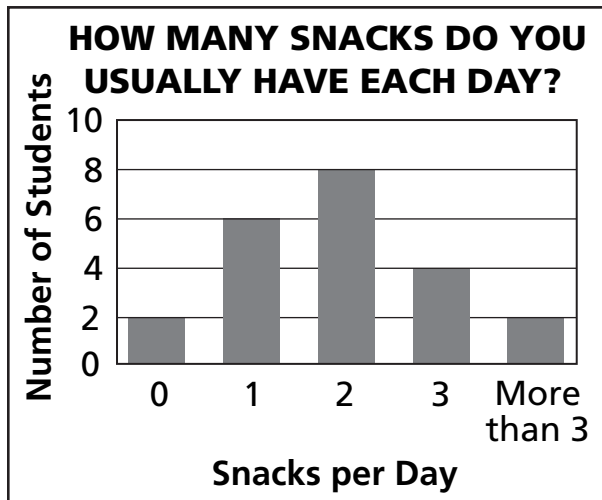

7 22 days + 6 days =  weeks

8 3 weeks - 4 days =  days

**Data Analysis and Probability**

For 9–11, use either the survey data or the graph.

<b>HOW MANY SNACKS DO YOU USUALLY HAVE EACH DAY?</b>	
Snacks per Day	Number of students
0	2
1	6
2	8
3	4
More than 3	2

9 How many students answered the question? \_\_\_\_\_

10 What was the most common response? \_\_\_\_\_

11 How would you describe the pattern shown in the graph?
