

Data Analysis and Probability

For 1–4, use the bar graph.

- 1 Which was the most popular lunch served on Tuesday?

- 2 Which two types of lunches together were the closest to 100 lunches?

- 3 About how many more sandwiches were served than salads?

- 4 Estimate the number of lunches that were served on Tuesday.

- 5 Which two types of lunches were the closest in the number served?

Problem Solving

Solve the problem. Explain your answer.

- 6 Sol built a fence around his square garden. He used 8 fence posts on each side, including 1 at each corner. How many posts did he use in all?
