

Measurement**Complete the equation.**

① 8 ounces = pound

③ 4,000 pounds = tons

⑤ $1\frac{1}{2}$ tons = pounds

⑦ 16 ounces = pound

⑨ 24 ounces = pounds

⑪ 5 pounds = ounces

⑬ 40 ounces = pounds

⑮ $\frac{1}{2}$ tons = pounds

⑰ 12 pounds = ounces

② 2 pounds = ounces

④ 3 tons = pounds

⑥ 32 ounces = pounds

⑧ 32,000 ounces = ton

⑩ 48 ounces = pounds

⑫ 2 tons = ounces

⑭ $3\frac{1}{2}$ pounds = ounces

⑯ $\frac{1}{2}$ ton = ounces

⑱ 112 ounces = pounds

Problem Solving**Solve the problem. Explain your answer.**

- ⑲ Eric has two cubes, each the same size. He glues them together so that a face on one cube exactly matches a face on the other. How many faces does the new figure have?

- ⑳ Douglas puts a square tile on his desk. He places equilateral triangles around the square so that one side of each triangle touches one side of the square. How many sides does the new figure have?
