

Multiplying Large Numbers

Complete the area model, puzzle, and record.

1

	200	60	7
40			
8			

$267 \times 48 = \underline{\hspace{2cm}}$

2

×	200	40	8	248
---	-----	----	---	-----

					248 ×		→	
					248 ×		→	
62					248 ×	62	→	

2 4 8	
× 6 2	

Test Prep

3 The Gomez family is planning a party at a restaurant. They are inviting 51 adults and 26 children. If the cost is \$49 per adult and \$24 per child, how much should they expect to spend on the party? Explain how you found your answer.
