

Angles Formed by Intersecting Lines

Use your knowledge of straight angles and opposite angles to find the missing angle measures.
(No protractors, please!)

Test Prep

3 Read, but do NOT solve this problem.

There are 36 students to seat in the library. If each table holds 8 students, what is the fewest number of tables needed for all to sit?

If there is a remainder, what should you do about it? Explain.
