

Area and Perimeter of Other Polygons

Use measurements to the nearest centimeter to find the perimeter. Use a ruler to draw lines showing how you would split each polygon into triangles to find its area.

1

Perimeter _____

2

Perimeter _____

Test Prep

- 3** Which measurement is NOT needed to find the area of the trapezoid?

- A. w C. z
 B. y D. x
-
- 4** Which polygon does NOT have at least 2 lines of symmetry?
- A. square C. right triangle
 B. equilateral triangle D. rectangle
