

Geometry

For 1–4, write the names of all the figures in the box that match the description.

- 1 All angles must be right angles. _____
- 2 All sides must be congruent. _____
- 3 Opposite sides must be congruent. _____
- 4 Opposite sides must be parallel. _____

Data Analysis and Probability

For 5–8, use the cards. Write *impossible, unlikely, likely, or certain* to describe the outcome when a card is selected randomly.

- 5 The card will have a number greater than 2. _____
- 6 The card will have a number less than 9. _____
- 7 The card will have a number greater than 3 and less than 5. _____
- 8 The card will have a number that is a multiple of 9. _____

Number and Operations

Find the difference.

9
$$\begin{array}{r} 57 \\ -39 \\ \hline \end{array}$$

10
$$\begin{array}{r} 61 \\ -44 \\ \hline \end{array}$$

11
$$\begin{array}{r} 82 \\ -27 \\ \hline \end{array}$$

12
$$\begin{array}{r} 70 \\ -34 \\ \hline \end{array}$$
