

Number and Operations

Use the dot sketch to find an equivalent fraction.

| | | |
|---|---|---|
| <p>1  $\frac{3}{4} = \frac{\square}{8}$</p> | <p>2  $\frac{2}{3} = \frac{\square}{12}$</p> | <p>3  $\frac{1}{2} = \frac{\square}{16}$</p> |
| <p>4  $\frac{3}{4} = \frac{\square}{12}$</p> | <p>5  $\frac{2}{3} = \frac{\square}{9}$</p> | <p>6  $\frac{3}{4} = \frac{\square}{16}$</p> |
| <p>7  $\frac{1}{4} = \frac{\square}{12}$</p> | <p>8  $\frac{1}{3} = \frac{\square}{9}$</p> | <p>9  $\frac{5}{8} = \frac{\square}{16}$</p> |

Problem Solving

Use a strategy and solve.

10 Together, Barnett and Hillary sold 38 raffle tickets. Barnett sold 8 more tickets than Hillary. How many did each person sell?

11 Roberto has \$0.71 in his pocket. He has a total of 7 coins and none of them are dimes. What coins does he have?

12 Ken threw 5 darts. Not all of them hit the target, but the ones that did landed in all three sections. Ken scored exactly 27 points. How many darts hit the target? In which sections did they land?
