

Algebra

Find the product.

1 32×28

	30	2
20		
8		

$32 \times 28 = \underline{\hspace{2cm}}$

2 27×43

	20	7
40		
3		

$27 \times 43 = \underline{\hspace{2cm}}$

Complete the table. Then find the product.

3

×	30	6	36
20		120	
7	210		252
27		162	

$36 \times 27 = \underline{\hspace{2cm}}$

4

×	70	2	72
10	700		
3		6	216
13	910		

$72 \times 13 = \underline{\hspace{2cm}}$

Geometry

For 5–6, use the coordinate grid.

- 5 Draw the figure after it has been translated 6 units left and 5 units up.
- 6 Draw the reflection of the figure after it has been reflected over the dotted, horizontal line.
