

Number and Operations

Solve the problem. Then decide what to do with the remainder. Write *ignore the remainder*, *show the remainder as a fraction or decimal*, or *round up the quotient*.

- 1 There are 31 students on the school soccer team. They travel in vans to each game. If each van can carry 7 students, how many vans will be needed?
- _____

- 2 There are 145 ounces of water in the water cooler. If you fill 6-ounce glasses, how many glasses will by you be able to fill from the cooler?
- _____

- 3 Darwin has a strip of wood 90 centimeters long. He needs to cut it into 4 equal pieces for a picture frame. How long will each piece be?
- _____

Measurement

Measure the sides of the parallelogram to the nearest centimeter. Draw in the height, and measure it to the nearest centimeter. Record the perimeter and area.

- 4 Base BC : 6 cm
- Height: _____
- Perimeter: _____
- Area: _____
